

I recently bought a car with XM radio and it's a hit with everyone who hears it. One of the strong points is it's variety of programs and it's lack of commercials. Our reception was outstanding on our recent trip to San Diego. I request you vote against any limitations such as those proposed in NAB's Petition 04-160 to eliminate local weather and traffic reports. There are no valid grounds for limiting XM service except to reduce competition. I thought competition was what capitalism was all about.

Thank you for considering my request and please inform me of your decision on this matter.
